

DANIEL MANCILLA TEJERINA

Systems Engineer | Fullstack & Backend Software Engineer (.NET / C# / Python / React / Angular)

Tarija, Bolivia | danimtx03@gmail.com | +591 71168130
LinkedIn: [linkedin.com/in/danimtx](https://www.linkedin.com/in/danimtx) | GitHub: github.com/danimtx

PROFESSIONAL SUMMARY

Results-driven Systems Engineer with solid experience in designing and developing robust software, clean architectures (Clean Architecture, Hexagonal, Microservices), and integrating intelligent workflows with AI Agents and Automation (n8n).

Two-time regional finalist in the ACM-ICPC South America Finals (2024 and 2025), equipped with advanced analytical thinking for complex problem-solving, algorithmic optimization, and high-performance database design. Proven experience leading technical teams under agile methodologies and delivering complete products from architecture design to production deployment.

CORE SKILLS

- Languages:** C#, Python, TypeScript, JavaScript, C++, PHP, SQL.
- Backend & Architecture:** ASP.NET Core Web API, Node.js, Clean Architecture, Hexagonal Architecture, Microservices, RESTful APIs, GoF Design Patterns, CQRS.
- Frontend & Mobile:** React, Angular, React Native (Expo), HTML5, CSS3, Tailwind CSS, Responsive Design.
- AI & Automation:** Artificial Intelligence Agents (LLMs, Prompt/Context Engineering), n8n Automation Workflows, AI API Integration.
- Databases:** PostgreSQL, SQL Server, MySQL, Firebase Firestore. Advanced relational data modeling, indexing, and query optimization.
- DevOps & Cloud / Tools:** Docker, Git/GitHub (CI/CD, Workflows, Branch Protection, Code Reviews), Linux, Postman.
- Methodologies & Leadership:** Scrum, Agile, Sprint Management, Pair Programming, Code Reviews, Problem Solving.

PROFESSIONAL EXPERIENCE & TECHNICAL PROJECTS

Software Developer & IT Support (Internship) | Cybercorp

Tarija, Bolivia | 2024 - 2025

- Task Management System:** Designed and implemented an internal fullstack system for task assignment, tracking, and status monitoring for technical staff, optimizing response times and operational visibility.
- Data Modeling:** Structured the relational database to manage users, roles, support tickets, and service SLA compliance metrics.
- Infrastructure & Physical/Digital Security:** Planned and deployed video surveillance and IP/CCTV security camera systems with network configuration, storage, and secure local and remote access.
- Technologies:** C# / .NET, SQL Server, JavaScript, TCP/IP Networks, CCTV Security Systems.

Computerized Information Systems Technician | Departmental Electoral Tribunal (TED Tarija)

Tarija, Bolivia | August 2025

- Administered and operated the computerized information system for data validation during the 2025 National Elections (ODS N 424/2025).
- Real-time verification of electoral data, determining voter eligibility status, and resolving discrepancies in voter registration records.
- First-level technical support for citizen guidance and referral of special cases according to electoral regulations.

Software Architect & Fullstack Developer | "Lugares Ocultos de Tarija" (Hidden Gems of Tarija)

December 2025 - Present

- End-to-end design and development of a tourism mobile application (React Native / Expo) connected to a scalable backend for destination geolocation, routes, and gastronomy.
- Database modeling and optimization in PostgreSQL for geospatial queries and efficient multimedia content storage.
- Implementation of layered architecture patterns to ensure long-term modularity and maintainability.

Game & Logic Developer | "Dino Game" (EZ Team)

June 2024 - August 2024

- Development of a 2D/3D Android game using Unity and C#, applying SOLID principles and Object-Oriented Programming (OOP).
- Mobile performance optimization (memory management, collision physics, and smooth 60 FPS rendering).

COMPETITIVE ACHIEVEMENTS & PROBLEM SOLVING

- **2x Latin American Regional Finalist in ACM-ICPC (South America / South Finals):**
 - **ICPC 2025 (RISE Team - UPDS Tarija):** Top 20 nationally in Bolivia. Solved complex algorithmic problems (graphs, dynamic programming, number theory).
 - **ICPC 2024 (Dijkstraidos Team - UAJMS):** Finalist in the South American regional site.
- **Active Competitor on Global Platforms:** Continuous participation in IEEEExtreme (18.0), Codeforces, AtCoder, LeetCode, and Competitive Programming Network (RPC).

EDUCATION

- **Universidad Privada Domingo Savio (UPDS)** - B.S. in Systems Engineering (2021 - 2026)
- **Universidad Autonoma Juan Misael Saracho (UAJMS)** - B.A. in Modern Languages and Tourism (In progress)

CERTIFICATIONS & CONTINUING EDUCATION

- **Artificial Intelligence, Arduino & Python Program** - Jeju National University (South Korea) / NIA-WFK (Aug. 2022, 40 hrs).
- **International Technology and Cybersecurity Congress** - AGETIC / UAJMS (Nov. 2024).
- **Google I/O Extended Tarija 2025** - Google Developer Groups (GDG) / Women Techmakers.

- **AI Agent Development & Automations with n8n** - Hands-on projects and workflows.
-

LANGUAGES

- **Spanish:** Native
- **English:** B1 Technical / Intermediate (Fluent reading of technical documentation, architectural specifications, and written communication).
